***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 14, drawn to an apparatus for emitting electrons, classified in class 313, subclass 495.
- II. Claims 15-24, drawn to method of manufacturing the apparatus for emitting electrons, classified in class 445, subclass 24.

Inventions of Group I and Group II are related as product and process of making it. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the process as claimed can be used to make other and materially different product. For example, the claimed process can make a field emission device having a substrate, a plurality of emitter tips on the substrate, a first dielectric layer on the substrate between the emitters, a first dielectric support layer contacting the first dielectric layer having an opening, a gate layer contacting the dielectric support layer having an opening contiguous with the opening of the dielectric support layer where the opening of the gate layer is smaller than the opening of the dielectric support layer.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Mr. Claude Cooke on 10/120/03 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
